## DETAILED ACTION

### *General Status*

1. This is a Final Action on the Merits. Claims 1-5, 7-15 are pending in the case.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-5, 7 and 9-15 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites "helix value" for inner and outer tube layers, whereas the specification discusses formulae for 'helix factor' for a fiber. It is not clear what is meant by 'helix value' for the tube layer; the specification does use the term 'helix value' however, fails to define the term in terms of equation or how such value can be calculated. Claims 5 and 9-12, all have similar recitation.

In claim 4, it is not clear what is meant by "said buffer tube layers ... inner tube layers.

### *Claim Rejections - 35 USC § 103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nave' et al. (US 5,343,549) in view of Fangmann et al. (US 5,611,016).

Nave et al. in figure 1, discloses a cable with two layers. However, Nave' et al. does not disclose the fibers in the tubes to be optically connected. Fangmann et al. in figure 7-10, discloses optical connection between the two corresponding fibers.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to optically connect the two fibers, as taught by Fangmann et al. so that the optical signal can be transmitted to a greater length.

#### *Response to Arguments*

6. Applicant's arguments filed 5/14/2003 have been fully considered. The Examiner has maintained 35 USC 112, second paragraph rejection and also the art rejection for claim 8. For claims reciting 'helix value', the Examiners position is clear, since the specification only defines 'helix factor', the claim should recite 'helix factor' in order for Examiner to interpret the claim. The Applicant is reminded that the specification should provide proper antecedent basis for the claimed subject matter (see 37 CFR 1.75(d)(1) and MPEP § 608.01(o)). As to claim 8, the claim only requires **some** of the concatenated cables to have **essentially** the same length (and not all the cables to have essentially the same length). The argument that the outer layer of the cables would have larger length, etc. has no value, as the claim does not refer to the outer layer at all, the claim only refers to some of the cable and the length does not have to

be exactly the same, it only has to 'essentially' the same. In view of these, the Examiner has maintained the art rejection for claim 8.

*Conclusion*

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
